Office hours: Tuesday & Thursday 12:00pm to 1:00pm, UEP 103

Course description

The course will examine major global public health problems and the range of responses from international organizations, transnational networks, and domestic and community-based institutions. Despite improvements in the health status of 92% of the world's population, 2.6 billion people live in poverty, and 1 billion live on less than \$1 a day. The course will explore the causes of these problems and the role of public health in addressing them.
